

Sizegh

The Sizegh Controller

A Patented, Advanced, Closed Loop controller and Interface Programme (SIP) for a wide range of Industries. Not trying for World domination, but to Provide simple Customer Value and Benefit

Imagine sensing the benefits of the *Sizergh* controller and the *Sizergh* Interface Programme

Smell the lifetime value -single board, not multiple modules; No PLC software validation

See the fully featured functionality - on board on/off, display and achieved output log; alter selection, PID, log and logging period; download log and reset

Touch the freestanding or networked systems management - set and forget or computer integration via SIP

Taste the easy to use computer communications - Windows validated SIP; off the shelf hardware and software; USB to serial, Bluetooth to serial, Network to serial

Feel the neat packaging to suit the application - freestanding board or eurocard case

Hear the multiple drive options - 0 to 5V, 0 to 10V, 0 to 36V, PWM or external power device
